

3-3-92
12.3.8 v.6

SEATTLE ENGINEERING DEPARTMENT
TRANSPORTATION DIVISION
MEMORANDUM

DATE: March 3, 1992

TO: Rex Stratton, Street Use

FROM: John Arnesen

SUBJECT: 3801 E Marginal Wy S - Requirements for Traffic
Operation

I have reviewed this location and have determined that the edge line stripe shown on the plan will not work properly. It would not provide enough width for vehicles to park at the north end.

After some discussion with others in the office, we have determined that there should be a dashed lane line installed to extend the existing one from Duwamish Ave S to approx. Sta 13+00. And install a W-79R (on a P4-14) on the west side at Sta 12+75, facing north.

Please let me know if this is agreeable with the contractor or owner, and if I can have our crews lay-out the dashed lane line. If you have any questions please give me a call.

Thank You
